

ALGO AIoT

Unleash a new world
of **business insights**
with **intelligent monitoring**

Your business needs more than just surveillance

Reimagine your current surveillance infrastructure. Today, they are the eyes of your business to protect assets and people, but their potential is only limited to security.

What if we told you that your surveillance systems could do so much more than that?

Introducing ALGO AIoT — an Advanced Remote Monitoring Solution by CMS, which brings a new dimension to your business and provides critical insights powered by AIoT (artificial intelligence of things) and RPA (robotic process automation). With the evolution of advanced remote monitoring systems, you can now address your surveillance concerns while also unleashing a new world of business insights.

60,000+
alerts processed daily

1,000+
critical threats prevented

40+
deep learning AI modules

25%
energy efficiency achieved

Certified to global security standards

ISO 9001

ISO 27001

CERT-IN Certified

Smart business, smarter solutions

Our Advanced Remote Monitoring Solution ALGO AIoT integrates with your existing surveillance infrastructure and enables it with AI and IoT. Monitor footage and easily detect threats while also saving on the costs and complexity that come with hiring additional security for your business.

VSaaS system

Provides site status analytics and 24x7 real-time updates through secure web utilities and mobile applications. Users also receive alerts through the application via SMS and email.

AI-driven monitoring

AI gathers data from CCTV cameras and detects potentially suspicious anomalies like intrusions, vibrations, glass breaks, smoke, etc. The system is also continuously learning to better understand and respond to these situations.

The human touch

At our Command & Control Centre, our systems analyse exceptions with alert-based ticketing and a 24x7 staff that eliminates false alarms. Tickets are verified and then resolved by our agents.

Smart cloud storage

Data received from the monitoring system is securely stored locally on SSD drives as well as in the cloud with secure encryption.

Your first step in being a **step ahead**

Effective surveillance
at scale

Protect people
and assets

End-to-end
monitoring

Never miss an insight with future-ready monitoring

For businesses to thrive, the scope of video surveillance can't end with just security. ALGO AIoT Remote Monitoring Solution generates business insights for every location while also playing a part in boosting the performance and efficiency of your business.

A closer look

With the help of our à la carte AI modules, you can track everything in your store. Right from the footfall to demographics, from in-store customer activity to queue lengths, from section-wise analytics to aisle-wise analytics, based on monitoring. You will receive an industry-specific analytical report from the data we collect. This will help you anticipate demand and increase performance.

Elevate your workforce

Our 24x7 alert-based guarding will make sure to report events like branch overstays or if a guard is missing from his post. Our Remote Monitoring Solution will also help you with effective queue management techniques and hygiene audits.

Cut costs

Efficiency is key when it comes to cutting costs, which is why our Remote Monitoring Solution also keeps an eye on energy consumption at your business. We track it all—lights, power supplies, and air conditioning—and never miss an insight for your business's benefit.

Your camera is now a **business intelligence tool**
