GLOBAL R&D FACILITY MAY CREATE 4,000 JOBS

# US chip firm to set up ₹3,600-cr hub in TN

FE BUREAU  
Chennai, February 13

**US SEMICONDUCTOR EQUIPMENT** major KLA Corporation is set to invest \$400 million, or around ₹3,600 crore, in Chennai to set up a global research and development (R&D) and innovation campus. The proposed facility is expected to create up to 4,000 high-skilled jobs.

Sharing the development on X, Tamil Nadu Industries Minister TRB Rajaa said KLA, one of the "big three" in semiconductor manufacturing design and R&D, has signed a memorandum of understanding (MoU) with Guidance Bureau, the state's nodal agency for investment promotion and single-window facilitation, on Friday.

The 12-acre campus is envisioned as KLA's global R&D and innovation hub, with a potential built-up capacity of up to 1.5 million square feet over time. It will support advanced research in high-performance computing, process control engineering software and AI-driven semiconductor innovation. "When fully developed, this will be KLA's largest integrated R&D presence outside its global headquarters," Rajaa said.

Currently, Tata Electronics is setting up a ₹91,000-crore semiconductor fabrication facility in Dholera, Gujarat, along with an outsourced semiconductor assembly and test (OSAT) facility in Assam. Murugappa Group firm CG Power and Industrial Solutions is also investing ₹7,600 crore in an OSAT facility in Gujarat.

Tamil Nadu is focusing on developing a less capital-intensive, fabless semiconductor ecosystem centred on design, R&D and allied segments rather than wafer fabrication or assembly and test facilities.

**SEMICON PLAY**

**Location:** 12-acre R&D campus in Chennai **Built-up capacity:** Up to 1.5 mn sq ft (phased development)

**Focus areas**  
■ High-performance computing

■ Process control engineering software

■ AI-driven semiconductor innovation

■ Facility to become KLA's largest integrated R&D presence outside its global headquarters

■ Investment strengthens Tamil Nadu gov't's ambition to build a full-stack semiconductor ecosystem

## Alkem unit to buy 55% in Swiss firm for \$118 mn

REUTERS  
Bengaluru, February 13

**ALKEM LABORATORIES' MEDICAL** devices unit will buy up to a 55% stake in Switzerland's Occlutech for €99.4 million (\$118 million), the pharma company said on Friday, marking its entry into advanced cardiovascular devices.

The deal, expected to close by June 2026 and subject to final agreements and regulatory approvals, will give Alkem MedTech access to high-value markets such as the US, Japan, Germany and other Western European countries, Alkem MedTech CEO Kaustav Banerjee said in a statement.

The global medical devices market size is projected to grow to over \$1 trillion by 2034 from \$604.99 billion in 2026, according to market research and consulting services firm Fortune Business Insights.

Occlutech, the second-largest player in Europe's minimally invasive cardiac implants segment, derives about 85% of its revenue from Europe and the US.

Alkem Laboratories also reported third-quarter consolidated net profit of ₹636 crore, missing analyst estimates of ₹651 crore, according to LSEG data. Revenue rose nearly 11% to ₹3,737 crore, but fell short of estimates of ₹3,760 crore.

# Trai to add 'appeals' feature in DND app

OJASVI GUPTA  
New Delhi, February 13

**THE TELECOM REGULATORY** Authority of India (Trai) will introduce an appeals mechanism in its Do Not Disturb (DND) app, allowing users to escalate complaints if they are dissatisfied with telecom operators' responses, Chairman Anil Kumar Lahoti said on Friday.

Lahoti was speaking at an event to unveil revamped versions of the telecom regulator's consumer-facing apps. The appeals feature, currently under development, is aimed at strengthening accountability in spam complaint resolution.

"We already have it in plan, it will be made available at the earliest," Lahoti said.

The DND and MySpeed apps have been rebuilt nearly a decade after their initial launch in 2016-17, in line with evolving telecom technologies, user behaviour, and the growing scale of digital connectivity.

The revamp comes amid persistent concerns around unsolicited commercial communications. Trai data show that out of 3.1 million complaints received in 2025, over 1.7 million were registered through the DND app, making it the single-largest channel for spam reporting.

To tighten enforcement, Trai has expanded the scope of complaints to include unregistered

A revamped MyCall app will be launched by March, which will allow users to report call drops, muting and voice distortion

telemarketers (UTMs) — a key regulatory change introduced in 2025. Lahoti said this has improved traceability and

action against spam sources.

Regulatory action is triggered when five unique complaints are received against a sender. In such cases, outgoing services are barred for 15 days across all numbers linked to the sender. Repeat violations lead to disconnection of all telecom resources for up to one year and blacklisting across operators.

As part of enforcement action, Trai said over 730,000 notices have been issued to unregistered telemarketers, with 470,000 entities restricted for a month.

Trai is also set to launch a revamped MyCall app by March, which will allow users to report call drops, muting and voice distortion.

## DGCA slaps ₹1-cr fine on Air India in Airbus case

PRESS TRUST OF INDIA  
Mumbai/New Delhi, Feb 13

**AVIATION SAFETY WATCHDOG** DGCA has imposed a fine of ₹1 crore on Tata Group-owned Air India for operating an Airbus A320neo plane without the requisite airworthiness certification on at least eight routes last year, according to sources.

The Directorate General of Civil Aviation (DGCA), on December 2 last year, said it was probing the incident of Air India operating an A320neo plane without having a requisite airworthiness certification on at least eight routes.

The sources on Friday said the regulator has slapped ₹1 crore fine on Air India for the violations.

"Air India acknowledges the receipt of a DGCA order in relation to an incident that was voluntarily reported back in 2025. All identified gaps have since been satisfactorily addressed and shared with the authority," the airline said in a statement.

On November 26, 2025, the airline informed the DGCA about the flying of the A320 aircraft with the expired airworthiness review certificate (ARC) on eight review certificates.

ARC is issued annually in respect of an aircraft after a comprehensive review of its maintenance records, physical condition and verification of compliance with all airworthiness standards. It is a validation of an aircraft's main certificate of airworthiness.
